

Gentle Hand Soap

Makes approx. 250-300 ml | Pump or foaming bottle

INGREDIENTS

- 20-30 g grated natural bar soap (about 1/4 of a 100 g bar)
- 250 ml distilled water
- 1 tsp (5 ml) vegetable glycerin

INSTRUCTIONS

1. Heat the water.
2. Add grated soap and stir until fully dissolved.
3. Stir in the glycerin. Let cool completely.
4. Pour into a pump bottle. For a foaming dispenser: fill 1/4 with the soap mix and top up with water.

USAGE

Use a normal amount per hand wash. Very gentle on sensitive skin and hands.

This concentration (approx. 8-12% soap) works great. Make smaller batches for freshness - without preservatives, best used within a few weeks.

For personal, non-commercial use only. Always spot-test before use. Keep all products out of reach of children and pets. 3xploreWithUs accepts no responsibility for outcomes from these recipes.
